

A sensory garden for
blind persons

Presentation Groups st2s

• We are pupils of second st2s. What means technological sciences health social.

Presentation of the project

Our project is to build a sensory garden.

It consists has to make discover différentes sorts of plants to visual disabled persons.

For that purpose, we decided to realize a garden in which we shall create a route(course) along which the persons partially-sighted persons are going to discover interesting plants for the touch, the sense of smell, the hearing either the taste.

We need to realize this project of a place, that we already have in our establishment, but that it is necessary to adapt.

In the entrance of the route, there will be a panel of 70 on 50 centimeters written in Braille explaining to them the progress of the route.

Of this panel will leave a rope which they will have to follow to direct them.

NEEDS

35 Pickets of 150 cms: unity(unit): 2€
everything: 70€
125 M of rope (48mm
width): unity(unit): 1,24€

Everything: 155€

The Lot of 6 hooks(peaks) has to aim:
unity(unit): 3,60€
everything: 22€
